

Features and Benefits

Euromod is a modular range of outlets, plates & connectors designed for use in different countries. In addition to the existing range of Euromod modules for use with copper media, Molex Premise Networks also provides a range of solutions for Fibre Optic applications. When used in conjunction with the Molex Premise Networks Fibre Management Backbox, a standards compliant FTTD installation is possible, maintaining the correct bend radii and management features for securing the installed fibre.

- 50 x 50 mm angled module.
- Euromod compatible.
- Available with ST®, shuttered DuplexSC/ST®, shuttered DuplexSC, MT-RJ, shuttered LC, FDDI/ST® & ESCON/ST adapters.
- Multimode & Singlemode configuration.
- Compatible with 32mm deep trunking.
- Permits a 30mm bend radius.
